# Ashley Caryll Regalado

Ash is a software engineer and founder of Core Companion, a company focused on developing web-based systems for education and information management. She is passionate about creating practical, user-friendly solutions that improve institutional processes and accessibility through technology.

## About Ashley Regalado

Ash is a software engineer and the founder of CodeNest, a digital solutions company that develops web-based systems for academic and institutional use. Through practical innovation and user-centered design, Ash has built systems that simplify complex workflows, making technology more accessible for students, administrators, and organizations.

Her journey in software development began with a strong interest in creating tools that solve real problems through structured logic and design. This vision led to the development of the CHMSU Academic Program Application and Screening Management System, which digitized the student admission process. Under her leadership, CodeNest continues to work on projects that integrate functionality and usability, focusing on systems that support education and information management. Her work reflects a clear understanding of how technology can improve processes and connect people to opportunities more efficiently.

# Biography

A Software engineer passionate about building functional and user-friendly web applications. With experience in developing academic, management, and service-based systems, she focuses on creating digital solutions that improve efficiency and accessibility. Her projects reflect a growing expertise in both design and system development, combining practicality with innovation.

Carlos Hilado Memorial State University – Talisay  
College of Computer Studies  
**Bachelor of Science in Information Systems**

**Full Name:** Ashley Caryll Regalado

**Date of Birth:** December 29, 2003

**Age:** 21

**Occupation:** Software Engineer/ IT Specialist

**Address:** Bacolod City, Negros Occidental

**Email:** [acregalado.chmsu@gmail.com](mailto:acregalado.chmsu@gmail.com)

**Phone:** +630704643801

**Education:** Bachelor of Science in Information Systems

**Languages:** English, Filipino, Hiligaynon

**Interest:** Web Development, Software Development,  
Game Design, Database Management

## *Ashley's Early Life*

Ashley was born in the Philippines in 2003. As a child, she was naturally curious and loved to learn new things. She spent her free time drawing, reading, and creating small projects at home. Helping her family and observing the world around her taught her patience and responsibility. These early experiences built the foundation of her creativity and determination that would later guide her path in life.

## ***Ashley's Education***

After finishing high school, Ash continued her studies at a local university, taking up Information Systems. During her early college years, she developed a strong interest in understanding how technology connects people and improves daily tasks. While studying, she often helped her classmates with basic computer lessons and projects, realizing how much she enjoyed sharing knowledge. Through these experiences, she began to see how technology could solve real-life problems. This stage of her education marked the beginning of her passion for building practical and user-friendly systems.

# Career Path and Pivotal Moments

Ash's professional journey began in 2020 when she co-founded CodeNest, a small startup that created digital learning materials for students who wanted to learn basic programming. The project started as a simple idea to make coding easier and more engaging for beginners. A year later, she helped establish TechEase Solutions, a freelance group that built custom websites and simple systems for local businesses.

Despite facing challenges in managing projects and balancing studies, Ash continued to push forward, learning from every setback. In 2023, her team's work gained recognition from a local tech organization, inspiring her to focus on developing innovative software tools for education and small enterprises. These early ventures shaped her career path and strengthened her passion for technology and problem-solving.

*“My room became my office, and my bestfriend became my business partner. “We started helping students create learning materials and projects in a much simpler way. Everyone in the class could contribute and collaborate on their assignments and presentations. Then, we would compile everything and share the final products with schools across the city.”*

## Portofolio

### ***Academic Program Application and Screening Management System***

A web-based system designed to digitize the admission process for CHMSU College of Computer Studies. It automates applicant registration, document verification, entrance exams, interviews, and final admission decisions, ensuring a faster and more organized screening workflow.

### ***Pet Health Monitoring System of Illness and Disease***

A system designed to assist pet owners and veterinarians in tracking and managing pet health conditions. It records medical histories, identifies common illnesses, and provides reminders for checkups or vaccinations to support early detection and preventive care.

### ***Laboratory Management System***

A system developed to organize and monitor the borrowing, returning, and reservation of laboratory tools and equipment. It maintains proper inventory tracking and promotes accountability among users.
